

# BIOGRAPHY

## **Kolaleh Torkaman, Engineering Project Management NASA KSC**

Kolaleh Torkaman, a recent graduate of the University of Florida, holds a Bachelors degree in Industrial and Systems Engineering and a Minor in Business Administration. Her most educational job experience throughout college was for the Industrial Assessment Center under the Department of Energy (DOE) where she traveled to mid-sized manufacturing companies such as Pepsi, Nokia, Florida Orange Juice, and Piper-- just to name a few--and would recommend opportunities for system and process improvement in three focus areas of Waste, Energy, and Productivity. She also worked on a year long project with CSX Transportation and helped analyze and determine the best crossing material to use in order to minimize the damage to rail road crossings.

Kolaleh holds less than a year old career with NASA and hopes to make a difference by offering her outside-of-the box views & experiences.
